

As you find the unknown angle measures write them down in this chart. Remember, that if you know the measure, then you **MUST** have a reason. The reason must be one of the theorems or postulates that you have learned. Write the angles in the order that you find them **NOT** in numerical order.

Angle #	Angle Measure	Reason	Angle #	Angle Measure	Reason
			XX	XXX	XXXXXXXXXXXXXXXXXX

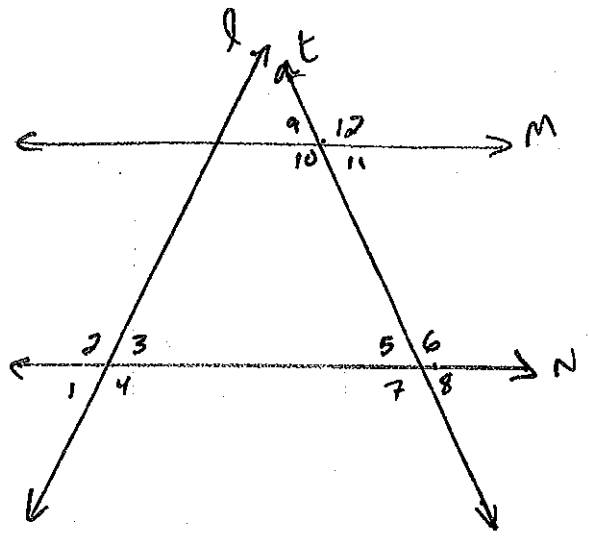

Given:

$$M \parallel N$$

$$m\angle 1 = m\angle 5$$

Prove:

$\angle 1$  and  $\angle 10$  are supplementary
